<b>Description</b>			
Hi,			
I'm new on Servoy, and my first task is to display the last 5 tweets from each client from our platform. I installed your plugin and the authentication is working correctly, but the function <code>plugins.twitter.getAccountTimeLine</code> retrieves the tweets from our company account, not from the users page as expected. And i did not find another function from 'Profile' that will retrieve users tweets. Please tell me if there is another way to do that.			
Thank you, Chiru Vlad

What's wrong with `plugins.twitter.getUserTimeLine(account, user, [withRetweets], [maximumNumberOfTweets])` ???

#### #2 - 07/17/2013 01:20 PM - Chiru Vlad

I don't know how i missed that method. I feel so stupid :P

Thank you very much!
