

Web Client Utils - Defect #750

Css stylesheets/js files added using WebClientUtils plugin lost

10/31/2013 06:21 PM - H Hardut

Status:	Reopened	Start date:	10/31/2013
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Browser (if web client):			
Description			
<p>We add custom css and js files to the page using the WebClientUtils plugin for our mobile app created with phonegap (the app just opens the servoy solution url).</p> <p>This works fine the first time you start the app. But when you kill the app and restart it the custom scripts/css are missing from the page.</p> <p>This can be reproduced in the desktop browser (tested in firefox):</p> <pre>Open the solution (included with this issue) in the browser Copy the url Open a new browser tab Paste the url and load</pre> <p>Now all custom css/js is gone from the page. Maybe this has something to do with Wicket page versioning and the way the WebClientUtils plugin attaches the extra css/js references to the page</p>			

History

#1 - 01/23/2014 04:58 PM - Andrei Costescu

- File patch.txt added

See <https://support.servoy.com/browse/SVY-5263> for more information. It describes what the patch does + related Servoy versions.

#2 - 03/31/2014 02:10 PM - Patrick Talbot

- Status changed from New to Closed

#3 - 04/01/2014 09:02 AM - Patrick Rosendaal

Just out of curiosity: this issue was closed yesterday without any visible commits to subversion that would indicate Andrei's patch has been applied. Was there a specific reason not to apply it?

#4 - 04/01/2014 07:04 PM - Patrick Talbot

- Status changed from Closed to Reopened

Very sorry, I confused this patch with another one submitted earlier.
I'll have a look at it asap.
