

Servoy Treeview Bean - Defect #754

extra column visible in webclient

11/05/2013 04:28 PM - Harry Schurink

Status:	Resolved	Start date:	11/05/2013
Priority:	Normal	Due date:	
Assignee:	Andrei Costache	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:			
Browser (if web client):	all		
Description			
In the webclient there is a second colum visible. The first column does not grow (like in the smartclient)

Hi Harry,

Which second column are you referring to? Maybe you can add some details on the grow part please.
Could you post a screenshot?

Regards,
Andrei

So 2 problems:

1. One extra column that we don't need.
2. Because of the extra column when you give the tree more space, we use a tabpanel with a splitter the extra space is going to the second column. We want to be able to make the tree/first column bigger.

#4 - 12/26/2013 11:55 AM - Andrei Costache

- Status changed from New to In Progress

- Assignee set to Andrei Costache

Ok, thank you for the explanations.

Could you please post some code, or preferably a minimal export (sample data included) so that I can see how you use the bean (what dataset is provided) and get that extra column?

Thanks in advance.

Best regards,
Andrei

#5 - 12/27/2013 07:32 PM - Andrei Costache

Just a short update: I have a small sample in which I can reproduce the extra column problem.
Please ignore my previous update's questions.

#6 - 01/09/2014 09:30 PM - Andrei Costache

- Status changed from In Progress to Resolved

- % Done changed from 0 to 100

Fixed the extra column and the column grow problems.
