Hi Sanneke,

Have tested via sample solution import into server-mode and images seem to display correctly in web-client Chrome browser, *user.png*.

Check format, compression of images in your solution, please. If issue still persist, share sample solution to reproduce it in web-client while running in server-mode

Hi Sanneke,

On dataset-fill, try to remove media:/// prefix, so instead of media:///tree_leaf.png -> tree_leaf.png
