

## VelocityReport Plugin - Defect #763

### \$baseHREF breaks Web-Client "Error Calling Server"

11/25/2013 06:52 PM - Curt Cadwell

<b>Status:</b>	Rejected	<b>Start date:</b>	11/25/2013
<b>Priority:</b>	High	<b>Due date:</b>	
<b>Assignee:</b>	Patrick Talbot	<b>% Done:</b>	0%
<b>Category:</b>	velocity	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	v3.0		
<b>Browser (if web client):</b>	chrome		

#### Description

If you include the \$baseHREF in header section of template to an htmlarea the rendered report displays fine but breaks Web-Client in Servoy with the message "Error Calling Server" in the upper right hand window. No error messages in Servoy log. But I did find under application\_server/server/logs called localhost\_access\_log.txt which I have attached. The weird thing is it is looking for the /eastwood/reports folder which never existed. I created it but still getting HTTP 403 errors on a temp file it looks like. But the other interesting thing it is also somehow changing the location of a BUTTON on the Servoy form which is not in the HTML area. It is looking for the my media icon for the button in eastwood/reports/resources and displays a HTTP 404.  
If I comment out the \$baseHREF in header section of template everything works fine?

#### History

##### #1 - 11/25/2013 07:54 PM - Patrick Talbot

- Status changed from New to Rejected

\$baseHREF was never meant to be used inside a web client.

It's used by the reporting engine when rendering PDF (or HTML OUT OF web client), to point to the Eastwood chart engine.

As such it is creating a link like this <base href="\$yourserver\$/eastwood"/> which is not compatible with web client URLs.

The base tag affects the whole page so what you see is expected behavior.

Just don't use the \$baseHREF if you intend to embed Velocity generated content inside a text area.

##### #2 - 11/25/2013 08:53 PM - Curt Cadwell

Thanks Patrick guess I misunderstood docs.
