Dialogs module - Defect #771

stacking dialogs

12/11/2013 07:52 PM - Serge Lesouef

Status:	New		**Start date:**	12/11/2013
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Browser (if web client):	IE or Ffox			

Description

though it works, I get errors in the server log when using several calls to the mod_dialog without closing the previous one.
ie, everytime a dialog is returning a value, it is marked for cleaning and there is an attempt to remove it from history which fails as the form is still busy if you call another dialog. it will be deleted later on as every attempt is trying to clean the whole bluePritnStack.
Could it be modified in order that the removal attempt is done only if the form is not in use? I have not found how to achieve this...

Is this still happening?

Are you able to provide the server log errors?

I may have a similar issue using mod_dialog in a web client under servoy 7.3.1

Has anyone analyzed this issue yet?

#2 - 01/29/2014 10:34 AM - Harjo Kompagnie

No, would like to see the log, or a sample-solution on how to produce this.
