#### Description

Hey,  
I'm generating a piechart with the VelocityReport-Plugin.

When I am just setting the titleColor for the Chart-Definition and not the titleSize plugins.VelocityReport.getChart() returns null. Setting the titleColor and the titleSize everything is ok.

One more question:

I would like to set the style of the labels and the legend. Will this be possible in the next time?

Ina

I'll look into that. You should be able to set the size or color independently.

As for legend styles, I'm not sure both Google and Eastwood support that, but if you're prepared to sponsor that feature I could look into it.
