<b>Browser (if web client):</b>	all		

**Description**

Hi

When the tree is not initialized (or has somehow crashed) there are example records in the treeview -->> "colors / sports / food". Can these data be removed?

If some data is needed for technical reasons, then please substitute with something like "No data in tree"

### History

#1 - 09/22/2014 11:21 PM - Imre Tokai

Hello Harry,

as quick work-around might embed below method's body within try/catch  
*globals.createDataSet()*  
and in catch block  
*treeviewDataSet = databaseManager.createEmptyDataSet( 0, ['id', 'pid', 'treeColumn']);*  
*treeviewDataSet.addRow([null, null, 'Empty']); // header labels*  
*treeviewDataSet.addRow([1, null, 'No data in tree']); // content*  
*return treeviewDataSet;*

Regards
