Description

Hi there…,

We have a report that was created with iReport 4.0 and changed it in JasperSoft Studio 5.6.0.final. We managed to compile the changed report by switching the report language to Java. In development the report displays fine, but on a test server we get a list of errors. The list of errors can be found in the document attached to this issue.
The used Servoy versions are:
- Servoy JasperReports 5.0.0 a2.
- Servoy 7.4.4.

Does anybody knows what is going wrong?
