Description

The charts4J API is not up to date to the latest Google Charts API parameters, which allows x/y offsets for grid, which would help for scaling as well.

Will need to patch the lib (find reliable sources, because the current trunk does not compile) and patch the API (most of the classes are final so not extendable!)

History

#1 - 07/16/2010 07:11 AM - Patrick Talbot

- Subject changed from *Gtid offset x/y not used* to *Grid offset x/y not used*

#2 - 07/17/2010 06:49 AM - Patrick Talbot

- Category set to *charting*

- Status changed from *New* to *Closed*

- % Done changed from *0* to *90*

Revision r341 and r342

Added xOffset and yOffset parameters to gridLines see [Charting](#) for reference

Works fine in GoogleCharts for Bar/Scatter/Line/XYLine, and for Scatter/Line/XYLine for Eastwood.

With Bar charts in Eastwood, only yOffset will be used, because xOffset cannot be calculated.

In Eastwood, bar categories x and width are calculated on the fly, so the xOffset will be ignored.

#3 - 07/20/2010 04:08 AM - Patrick Talbot

Additional info for Bar charts x grid lines in Eastwood:

if `grid x[AxisStepSize] == 0` the x grid lines won't appear, but for any value of `x[AxisStepSize] > 0`, the lines will always be centered on the bars.
